Abdulhaq Shah

Senior Software Developer / JavaScript Developer at Gsquad.io

Enthusiastic about technology, entrepreneurship and whats going in the field of technology. Love to learn and work on new technologies, traveling and book reading.

I have started my career as a MEAN Stack developer. Currently I'm working as JavaScript developer in South Ville Solutions and Gsquad specifically in (Node, Backbone, Marionette and Vue). Also do end to end testing by using Cypress as testing framework.

Beside development i also did content writing, social media marketing and project management on a small scale.

Competencies: JavaScript, NodeJs, AngularJs, ReactJs, VueJs, BackboneJs, MarionetteJs, MonogDb , Cypress Testing Framework

Lahore, Pakistan

Developing and maintain the functionality of the existing application. Managing the team of internees. Working on them on new application from scratch.
Technologies: ReactJs, NodeJs, MongoDB, ExpressJs, Mocha, Trello, Git Hub

ITboost | **Apr 2016 - Nov 2018 (2.6 years)**

Software Engineer / Mean Stack Developer
Lahore, Pakistan

Member of the core team in The Help Desk Company. Joined as Software Engineer and its an honour for me to be a part of team which started from

scratch to an amazing product ITBoost.

Responsibilities: Create new and maintian the existing functionality of the product. Lead the team in many projects like Billing, Import Functionality and Production Issues.

Technolgoy: AngularJs, NodeJs, ExpressJs, MongoDB, Redmine, GitLab, WBS, Scrum, Agile

Cell Smart POS	**Apr 2015 - Dec 2015 (8 months)**

Software Engineer / Mean Stack Developer   **Lahore, Pakistan**

Cell Smart POS as front end developer. Worked on different technologies like Angular.js, Bootstrap, Html, JavaScript.

▤ Projects

Billing

Company: ITboost

www.itboost.com

Tools: NodeJs, MongoDB, Stripe, AngularJs

Integrated lots of different stand alone functionalities but the best functionality which I like in my ITboost tenure is that Billing project I have done with my best team. Leading a team of 3-4 developer to add functionality of billing / payment method in the product. We have to use third party payment method Stripe and to perform all the queries through our Backend service which is in Nodejs. First of all we have done detail documentation, then WBS (Work Breakdown Structure), created task for the project and completed the task in the given time limit.

Team have done great job and the billing functionality goes live in the mean time.
